Subject: Update from SWN on the prospective case study in Arkansas

Hi Jeanne and Cyndi,

I spoke with Doug Melton this morning, and while we were on furlough, SWM completed their projections of their 2014 drilling program. Doug said SWN has identified a few (he did not have a specific number) potential study sites. None meet our original criteria of having a 1 mile buffer to any nearby drilling activity, but they do have at least ¼ to ½ mile distance and a minimum of 2 years since completion of that drilling activity. (b) (5)

Doug requested I confirm with EPA management that we continue to have the funding available to move forward with this project. If so, we discussed having a meeting in their Conway, Arkansas, offices (near Little Rock) to go over the specifics of the various sites and potentially do a site visit of the finalist site. (b) (5)

I told him I would get back to him next week.

Mike
